

Integrated opening solutions

ASSA ABLOY

The global leader in
door opening solutions

The ASSA ABLOY Group

World leaders in door opening solutions

As the world's leading door opening solutions provider we are dedicated to satisfying end-user needs for security, safety and convenience.

With over 150 companies operating in more than 70 countries, the Group is the strongest global player in the industry with circa €7 billion sales worldwide. Today ASSA ABLOY is the leading global supplier of intelligent lock and security solutions. Its products account for more than one in ten of all lock installations worldwide.

ASSA ABLOY Group is represented in all major regions, in both mature and emerging markets, with leading positions in much of Europe and North America and in Africa. In the rapidly growing electro-mechanical security sector, the Group has a leading position in fields such as access control, identification technology, automatic doors and hotel security.

ASSA ABLOY in Nigeria

Global solutions on your doorstep

ASSA ABLOY has two facilities in Lagos, Nigeria. With a local footprint, we offer global quality with local knowledge and implementation. Our comprehensive range of products allow us to supply a broad range of projects including hospitals, schools, office developments, high rise buildings, high security applications, and residential facilities.

ASSA ABLOY Nigeria specializes in the supply of mechanical & electromechanical hardware for doors, including wooden & steel security doors, automated sliding doors. After-sales service and maintenance is provided for automated doors with accredited installation teams.

Access Control Solutions

Expanding any access control system

Products

- Wireless access control solutions
- Battery-powered cylinders
- Battery-powered escutcheons
- Battery powered door position sensor
- Multiple credential and RFID supported technologies
- Electric strikes
- Magnetic locks
- Biometrics
- Access cards
- Card readers

Access control systems by ASSA ABLOY enable administrators to control access to secure areas through physical, logical, electronic, offline, online and wireless access control solutions. Access control systems are the ideal way of overcoming the security challenges posed by a high turnover of people entering and exiting any facility.

Aperio® wireless door lock technology

ASSA ABLOY's Aperio® wireless lock technology offers an affordable way to integrate mechanical doors into an existing access control system. Aperio® wireless locks with RFID-readers replace existing mechanical locks without the need for additional expensive wiring. Aperio® technology is also easily integrated into access control systems developed by any manufacturer. The energy efficient, battery-operated locks maintain physical security in the event of electricity outages.

Intelligent keying

ABLOY PROTEC² CLIQ combines mechanical and electric technologies into one effective solution. Thanks to the seamless integration of these two technologies ABLOY PROTEC² CLIQ is double secured.

ABLOY PROTEC² CLIQ remote provides highly flexible key access management via the internet thus providing a timesaving and cost-effective solution.

In case of a lost or stolen key, access rights of the key can be controlled remotely. An audit trail can be collected from the keys and the ABLOY CLIQ cylinder. Communications and data are protected by secure encryption.

Products are a top choice in the aluminium OEM hardware market and are at the forefront of driving performance standards and product innovation.

Electric strikes

An Adams Rite electric strike is an integral part of your access control system. With products to suit widely different types of door including steel, timber and aluminium, this comprehensive range offers the solution.

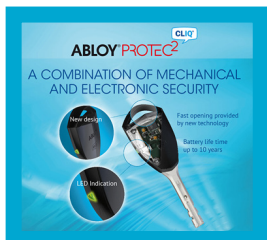

Magnetic locks and bolts

Surface mounted direct pull magnets are used as a part of an access control system for electronic locking applications.

With the development of new products Adams Rite uses their experience and innovation to produce quality products for existing and new markets.

HID access control components

HID Global offers the industry's most extensive range of inter-operable and future-proof physical access control solutions. HID's access control readers and credentials feature low frequency (125 kHz), high frequency (13.56 MHz) and multi-technology RFID solutions.

Architectural Solutions

Products

- Pull and lever handles
- Surface mounted door closers
- Concealed door closers
- Panic Exit devices
- Door hinges
- Coat hooks
- Door viewers
- Door stops
- Lock sets
- Lock cases
- Timber doors
- Steel doors

ASSA ABLOY can assist through all phases of a building project to help create a safe and secure building while ensuring the original architectural vision.

Secure door openings

ASSA ABLOY offers a wide selection of high-quality door closers for any need. Door closers are an integral part of many commercial and semi-commercial-doorsets and access control solutions. Door closers maintain the integrity of fire doors along exit routes in buildings used by the general public. The self-closing function offered by door closers also provides an important level of security for external doors, preventing them from slamming, staying open unintentionally or blowing open in the wind.

Safe exit

Exit devices and panic exit devices from ASSA ABLOY are safety devices which ensure a free way out at all times, while restricting door entry access. Devices are operated by either a lever or paddle handle allowing immediate escape when pressure is applied. Emergency Exit Devices are tested to EN179 and CE Marked.

High aesthetic ironmongery

Handles and accessories are available in a variety of styles and finishes to allow the customer to tailor the look of any door. We have a wide variety of lever

styles from stainless steel, to brass and traditional furniture. The ASSA ABLOY range of door furniture is ideal for the majority of applications and suitable for use in contract, public, commercial, institutional and residential buildings.

Hinges are suitable for light and heavy duty applications and for use on doors which are subject to a high frequency of use by the public with little incentive to exercise care. Available in left or right hand.

ASSA ABLOY offers a comprehensive range of locks for both architectural specification and residential use. This includes those which have been specifically designed for high security applications on external doors. There are also standard variants for internal doors.

Fire rated steel and timber doors

A leader in the design and manufacture of high quality certified steel doors sets, and provide solutions for acoustic, security, speciality (blast & ballistic), clean-room doors, glazed screen doors, lead lined doors and windows. Prometal supplies, among other; the residential, retail, sports, theme park, oil & gas and healthcare industries.

Critical Infrastructure Solutions

Creating customer value

Products

- Intelligent keying systems
- High security cylinders and padlocks

demand high security combined with robust user application.

Key and asset management systems

Traka is a world leader in innovative technology for sophisticated intelligent access control, key management solutions and keyless electronic lockers.

Traka's range of products enables organisations to monitor, control and record the use of almost any physical asset, including; premises, facilities, secure areas, equipment, machinery and vehicles.

Traka provides intelligent key/equipment management and access solutions to better protect important assets.

Hotel Solutions

User friendly security systems

Products

- Hotel locking solutions
- Cylinders and Master Key systems
- Panic exit devices
- RF locks
- Access control

ASSA ABLOY products provide user friendly security systems that meet the unique operational needs of hotels and resorts. ASSA ABLOY products include hotel locking systems and in-room safes, as well as energy management systems, and continuously introduces new innovations to the industry.

Electronic locking solutions

TESA hotel locks and electronic locking solutions from TESA deliver added value to the hospitality industry. Ease of administration, increased security and convenience are just a few of the obvious benefits

for both guests and staff. A strong range of hotel locking solutions with energy-saving features, which include RFID and NFC-based products. TESA electronic guestroom locks have been carefully designed and engineered to our own exact standards, in order to provide the quality you need to secure your valuable property and guests.

A new brand to ASSA ABLOY, the Digi hotel locks provide a cost effective solution to smaller hotels with a range of RF card locks, magnetic card locks and IC card locks.

Home Security Solutions

Introducing new technology

Products

- Digital door locks
- Locksets
- Padlocks
- Safes and safety boxes

Yale has been looking after people's homes and their prized possessions for almost two hundred years. Today, as part of the ASSA ABLOY group, Yale has become synonymous with innovation and quality, offering a wide range of advanced products that meet the most demanding security needs for your home, which now incorporate smart and digital solutions. Yale has been at the forefront of this change, introducing new technologies like digital door locks and electronic safes.

Digital door locks

The ultimate test of any technology is how seamlessly it fits into everyday life. Yale's Gateman range of digital locks has been created to do exactly that, with a sleek, elegant and highly secure design. Convenient and highly secure, they also boast an alarm, which sounds if anyone tries to tamper or force the device. The

digital mortice lock offers keyless entry via PIN code or fingerprint identification, as well as with a manual override key. Easy to operate and ultra-modern aesthetics make this digital door lock an ideal addition to any home or small business.

Electronic safes

The Yale Safes range is designed to provide the truest form of security so that life can be enjoyed without worrying. Combining the latest technologies and experience to produce the safes that meet the most demanding requirements. The safes range consists of affordable value safes as well as higher security safes.

Yale's fire safes incorporate the latest technology digital lock. The safes will withstand fire for up to one hour.

Entrance Systems

Simple and convenient solutions

Products Categories

- Automatic revolving doors
- Curved sliding door operators
- Swing door operator
- Telematic sliding door operator
- Automatic door systems for integrated balanced doors
- Sensors

Automatic doors are in demand because they offer a simple and convenient security solution to entrance and exiting. Through its broad product range, ASSA ABLOY has the unique ability to integrate automatic door operation with locking and access control.

Door automatics for all types of doors

ASSA ABLOY Entrance Systems is the world leading supplier of automatic door systems, for use in different environments where people live and work. Right from the start, in 1962, Besam became aware of pedestrian traffic concerns that are unique to various market sectors. Global experience and local awareness are two factors that have contributed to making Besam the product of choice of automatic door systems.

This approach opens a whole new range of possibilities for you. ASSA ABLOY will take care of your automatic doors from start to finish, from technical support in planning and design, to planned maintenance and service.

Quite simply, if you choose door automatics from ASSA ABLOY, you choose convenience, cost reductions, safe passages, solutions to traffic problems, doors that are aesthetically pleasing and enhanced security.
